AI Recommendations

- ☐ **A1:** Consider adding testimonial carousel to homepage
- ☐ **A2:** Review mobile navigation for usability improvements
- ☐ **A3:** Optimize images for better page loading performance
- ☐ **A4:** Implement progress tracking for 30 Day Roof Challenge
- ☐ **A5:** Add social sharing capabilities to case studies

Active Tasks

- ☐ **19:** Create dashboard for Roof Challenge participants
- ☐ **20:** Design email templates for lead nurturing
- ☐ **21:** Implement A/B testing for landing pages
- ☐ **22:** Set up Google Analytics 4 tracking
- ☐ **23:** Create content calendar for blog posts

Backlog

- ☐ **B1:** Implement blog infrastructure
- ☐ **B2:** Create content categorization system
- ☐ **B3:** Develop resource download capabilities
- ☐ **B4:** Set up newsletter signup integration
- ☐ **B5:** Implement case study template
- ☐ **B6:** Develop results visualization components
- ☐ **B7:** Add testimonials integration
- ☐ **B8:** Create video testimonial support

- ☐ **B9:** Implement multi-step interactive quiz
- ☐ **B10:** Develop PDF report generation for quiz
- ☐ **B11:** Set up analytics for 30 Day Roof Challenge
- ☐ **B12:** Create before/after gallery for Roof Challenge results

Completed Tasks

-  **1:** Create repository and set up initial project structure
-  **2:** Set up CI/CD pipeline for automatic deployment
-  **3:** Implement responsive design for all pages
-  **4:** Configure Tailwind and shadcn/ui for styling
-  **5:** Create navigation and layout components
-  **6:** Implement basic routing with React Router
-  **7:** Build homepage with key messaging
-  **8:** Develop About page with team information
-  **9:** Create initial services overview page
-  **10:** Deploy website to production environment

Environment Setup

- React: Frontend library for building user interfaces
- TypeScript: Typed JavaScript for improved developer experience
- Tailwind CSS: Utility-first CSS framework
- Shadcn/UI: Component library built on Radix UI
- Vite: Build tool and development server

- Node.js: JavaScript runtime for server-side code
- Git: Version control system
- GitHub: Source code hosting and CI/CD integration

Significant Changes Log

2023-04-01

- Updated dashboard components with real data visualization
- Fixed responsive design issues on mobile devices
- Implemented AI recommendations system
- Initiated 30 Day Roof Challenge landing page project

2023-03-31

- Completed Services page with pricing tiers
- Fixed navigation links
- Rebuilt dist folder for deployment
- Updated Home page components

2023-03-30

- Implemented Blueprint dashboard component
- Created Sales dashboard visualization
- Added ContractorScale AI tiers description
- Deployed initial version to production

Items Needed

- Professional headshots for team section

- Complete case study content for Semper Solaris
- Additional testimonials from clients
- SEO keywords and meta descriptions for all pages
- Logo variations for different backgrounds
- Roof transformation photos for 30 Day Challenge
- Testimonials from previous roof project clients

Reminders

- Push changes to GitHub after major updates:

```
git add .  
git commit -m "Description of changes"  
git push origin main
```

- Run builds and check for errors before deployment
- Test all links and forms before pushing to production
- Update the changelog with significant changes
- Review responsive design on mobile, tablet, and desktop
